PROJECT STANDUP 1

AUSTRALIAN SAFETY ENFORCEMENT: MOBILE PHONE

Coordinator: Mr. Minh Hoang
Group: HCMC - Group 3
Le Pham Tu Quynh - 104813697
Nguyen Pham Minh Dong - 104773649
Nguyen Minh Kiet - 104761301

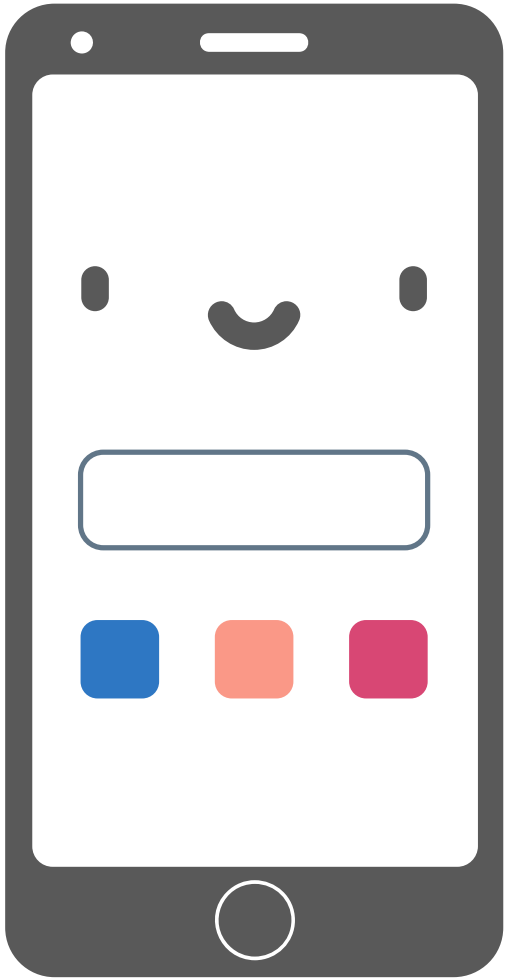

Table of Contents

Progress 01

Updates on work completed and in progress

Blockers 02

Blockers and challenges the team is facing

Next step 03

Summary plan for Standup 2

Data Story: From Exploration to Critical Insight

What

- ★ Focuses on descriptive trends only
- ★ Representation confuses viewers

Why

- ★ Data limitations:
- ★ “All ages” (aggregated)
- ★ “Unknown” categories
- ★ May introduce bias

How

- ★ Developed structured research questions to guide analysis
- ★ New workflow
- ★ Integrated additional datasets

Solution

- ★ Research questions
- ★ Charts
- ★ Insights

QUESTIONS

Question 1

How have mobile phone enforcement fines changed across Australia from 2008 to 2024?

Question 2

Which jurisdictions consistently record the highest number of mobile phone infringement fines?

Question 3

How do enforcement actions vary across age groups?

Question 4

What is the composition of enforcement actions (fines, arrests, charges)?

Question 5

How does enforcement vary by location type (urban, regional, unknown)?

Question 6

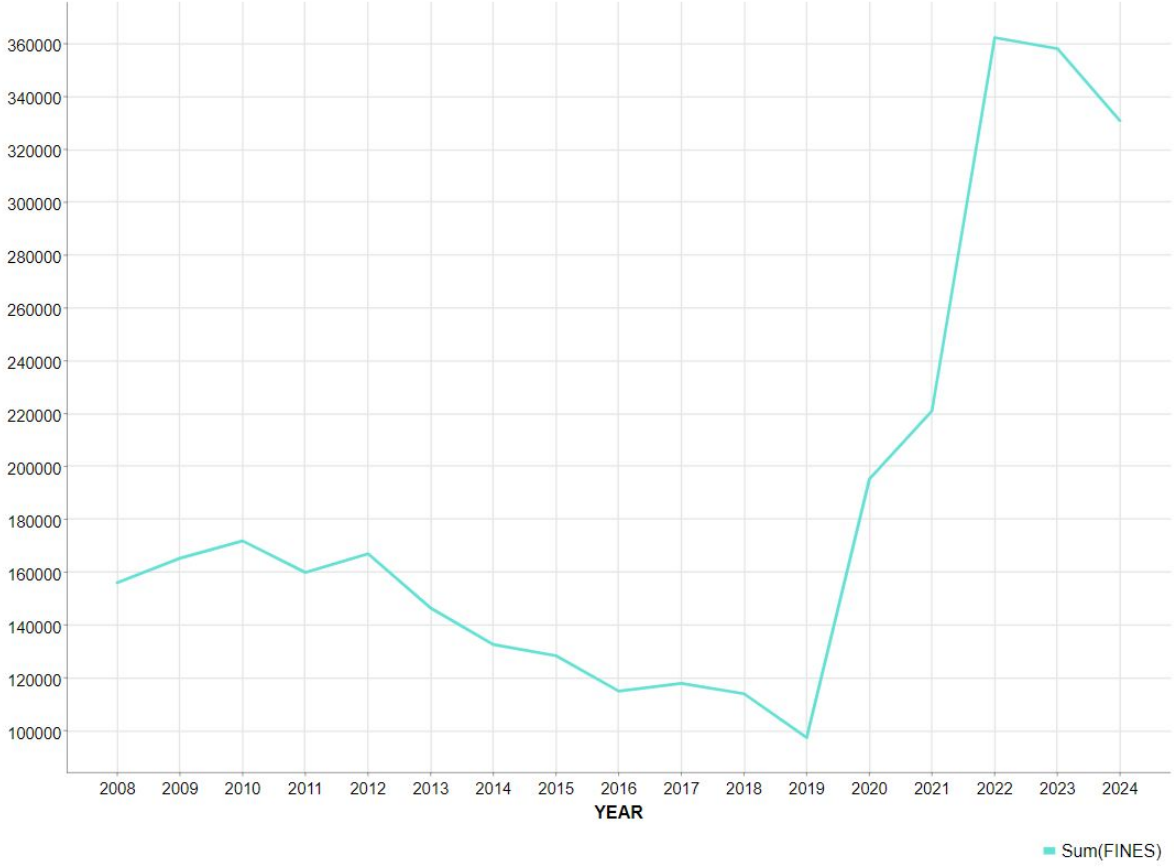
How do missing or aggregated categories affect data interpretation?

Question 7

Why did mobile phone enforcement fines increase during the COVID-19 period despite reduced mobility?

Question 1

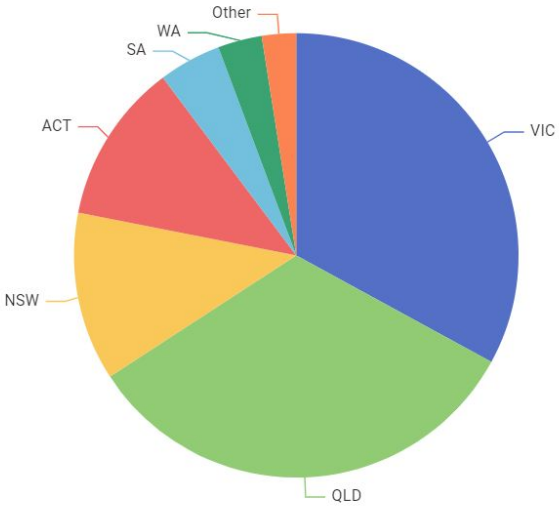
How have mobile phone enforcement fines changed across Australia from 2008 to 2024?



Question 2

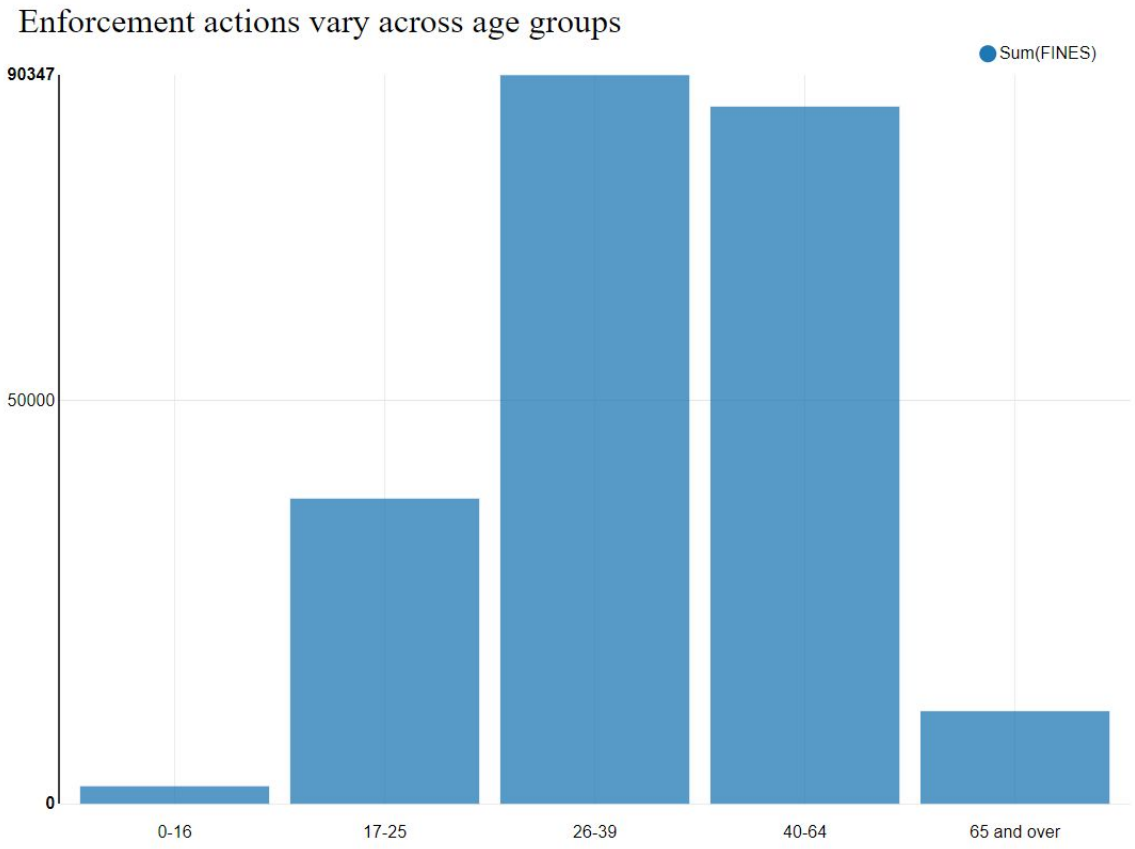
Which jurisdictions consistently record the highest number of mobile phone infringement fines?

Mobile phone usage fines by jurisdiction



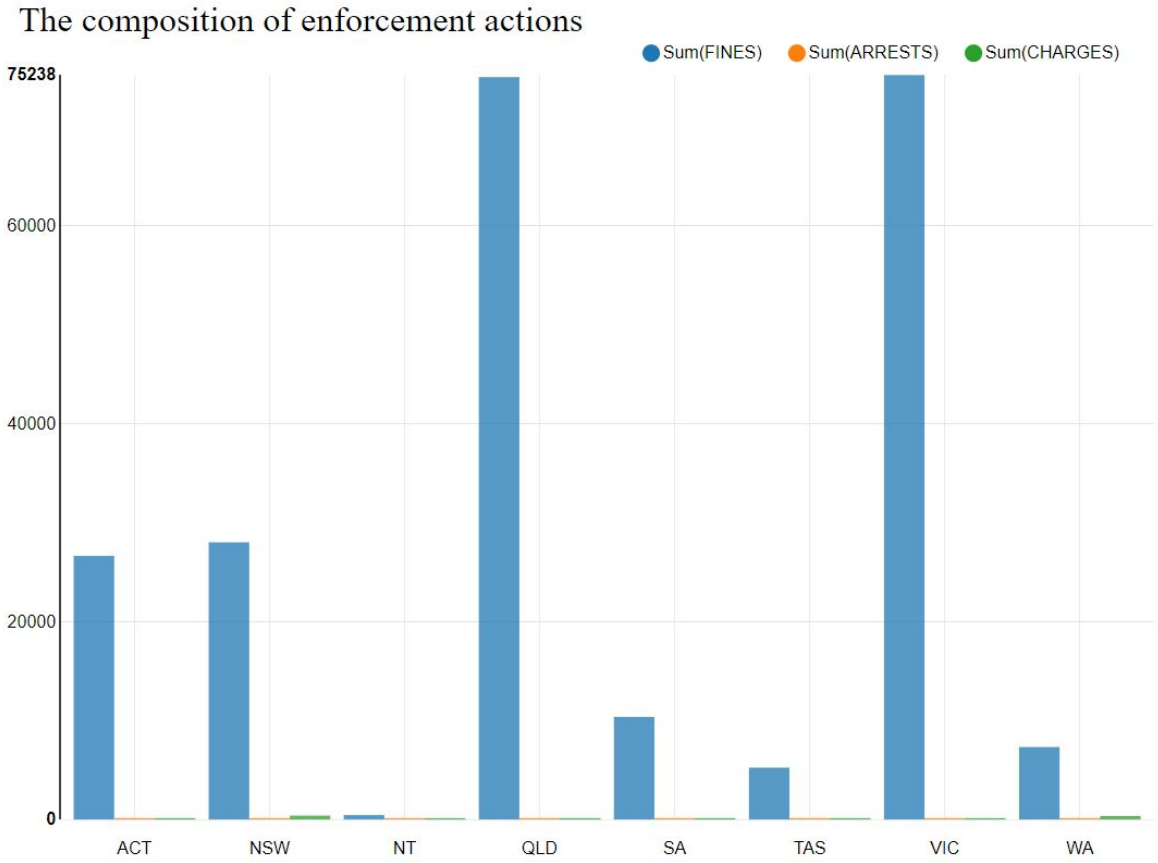
Question 3

How do enforcement actions vary across age groups?



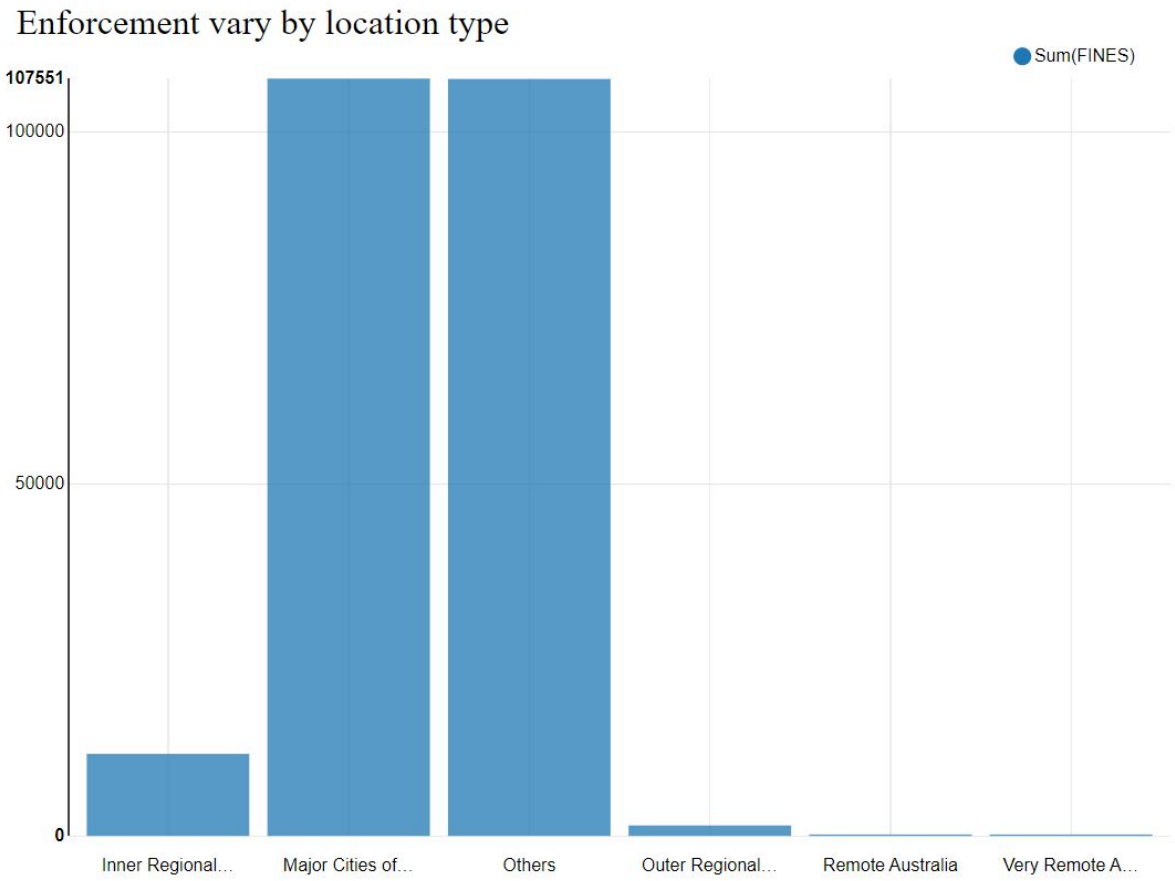
Question 4

What is the composition of enforcement actions (fines, arrests, charges)?



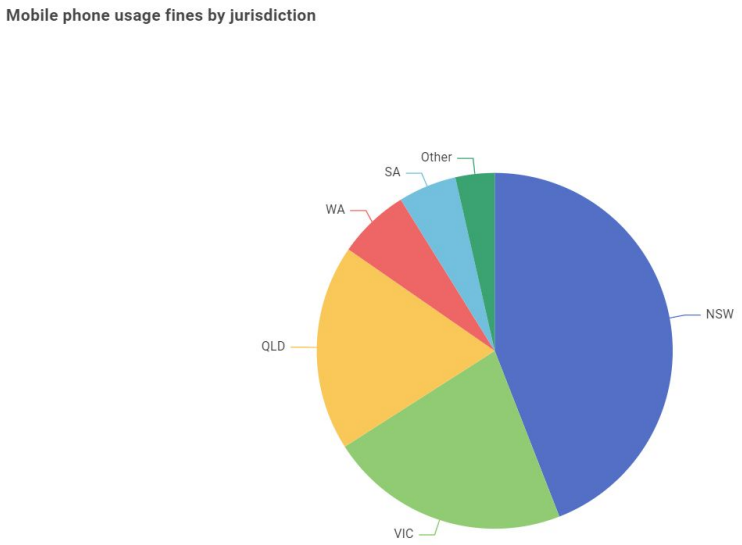
Question 5

How does enforcement vary by location type (urban, regional, unknown)?

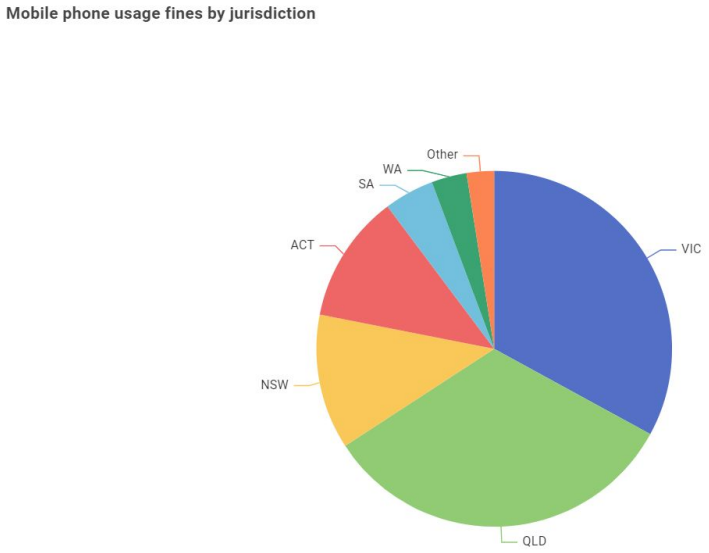


Question 6

How do missing or aggregated categories affect data interpretation?



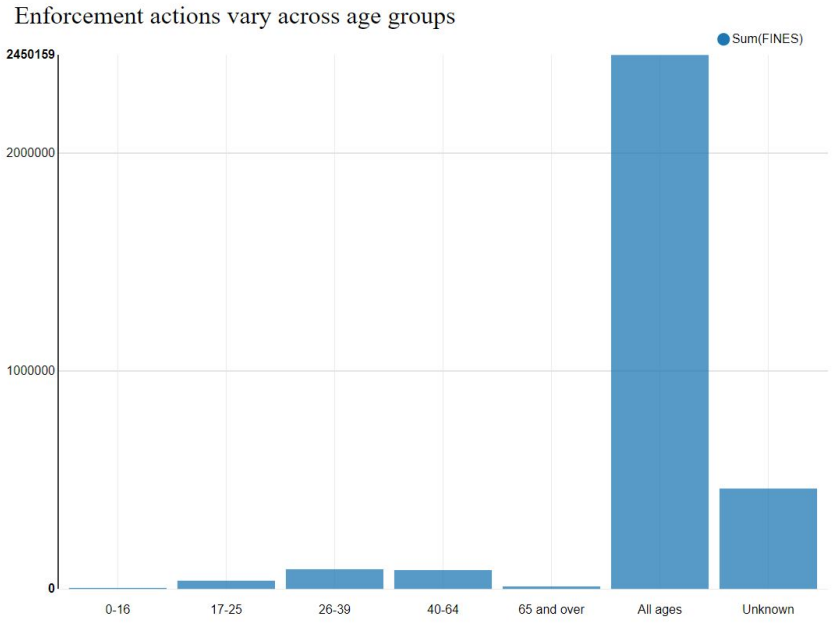
Before cleaning data



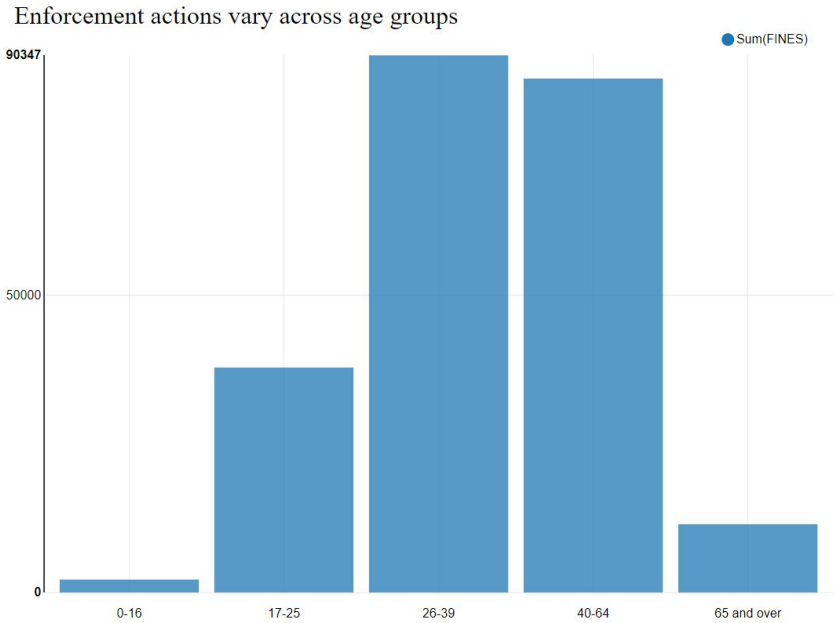
After cleaning data

Question 6

How do missing or aggregated categories affect data interpretation?



Before cleaning data



After cleaning data

Blockers and challenges the team is facing 😭

Question 3:

- Line plot - same problem in Power BI (many lines are clustered at the below axis line)
- Possible solutions: filter function, highlight

Question 4

- Bar Chart - Fines scale is too big compared to Arrests and Charges' scales

Question 5:

- “Unknown" & "All regions" values

Finding datasets

- Government block download access, files remove or expired, there are no .csv / .xlsx

03

Next Step

What we will do next 🐒

Design Boook

Draft section on Visualisation Design
Draft section of Interaction Design
Draft section of Website Design

KNIME

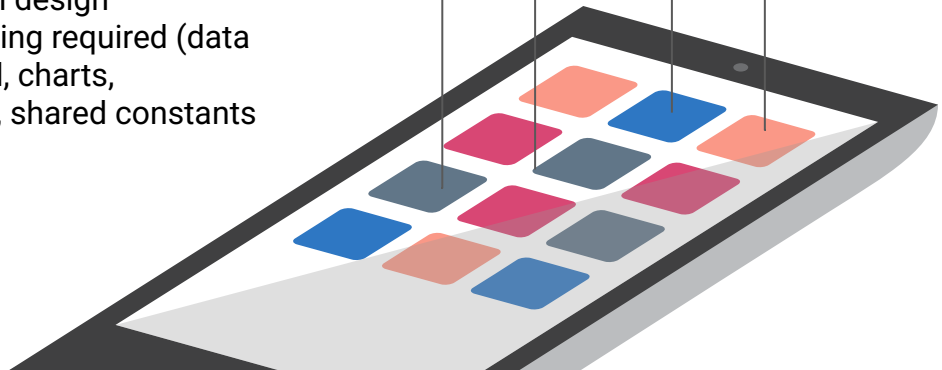
Update new charts
Adjust workflow

Website

Prototype/sketches of visualisation design
Plan for coding required (data to be loaded, charts, interactions, shared constants etc)

Prepare slides

Presentation



Thanks for listening
May we get a good Grade
